

This listing of claims will replace all prior versions, and listings, of claims in this application.

Listing of Claims:

1. (previously amended) A motor comprising:

a first housing having a radius which is greater than the width of the housing and having a plurality of magnets located thereon; and

a second housing having an opening therein in which the first housing is at least partially located and having a plurality of magnets located thereon, wherein either of the first or second housings is able to rotate with respect to the other housing;

wherein the magnets on either of the first or the second housing are electromagnets and wherein the electromagnets are energised simultaneously when the motor is in use so that the magnetic force of the magnets causes the one housing to rotate with respect to the other housing.
